WIND PROOF

WATERPROOF

QUALITY
FABRIC

FLEXIBLE
FABRIC

LIGHTWEIGHT
FABRIC

Unique high-tech polyurethane (PU) fabric with a breathable factor

SealFlex fabric consists of a PU membrane fused with a hollow polyamide lining. The PU membrane is 100% waterproof and the polyamide lining wicks the moisture away from the body, allowing vapour to disperse.

Quality Seal Flex Materials

SealFlex garments are constructed from the finest grade European fabric. The fabric is approximately half the weight of traditional rainwear fabrics and is able to stretch up to 150% and reform to its original shape without damage.

Quality Seal Flex Craftsmanship

Seal Flex garments have a shell-style 100% waterproof cover with high-frequency welded waterproof seams. The garments are resistant to puncture and will not tear. Seal Flex garments are suitable for most agricultural applications and are hand washable.
